WHO WE ARE

The ChenzonHub Story

Every company has a beginning - but ours began with a purpose: to make premium consulting accessible to the small businesses powering Cyprus. Founded as an answer to outdated, overpriced models, ChenzonHub delivers expert business consulting through streamlined monthly packages that don't drain your budget or bury you in jargon.

We are not a traditional agency. We are not freelancers. We are your long-term growth partner. Whether your business needs stronger operations or a sharper identity, we bring clarity, strategy, and consistency - month after month, from just €99/month.

THE DRIVE BEHIND OUR MISSION

Our Process

We begin by listening. Every client relationship starts with a discovery session that maps your current business landscape. Then we prioritize your pain points, recommend tailored solutions, and provide month-by-month strategic support that evolves with your needs. We don't just deliver a report. We roll up our sleeves and walk with you, step by step.

Our Mission

We exist to empower small and growing businesses in Cyprus to operate smarter, brand better, and grow sustainably - without the typical overhead of hiring agencies or in-house consultants. Every offering we create is rooted in solving real operational and branding challenges at a price point that small businesses can actually sustain.

Our Vision

To redefine what business consulting looks like for SMEs by building a model based on transparency, value, and local insight. We envision a Cyprus where even the smallest businesses have access to world-class consulting that adapts with them.

WHAT SETS US APART

We believe that accessibility and consistency are the new power tools of business growth. That's why our consulting services are built around monthly subscription models - giving you premium support without long-term contracts or surprise costs. Unlike traditional agencies, we focus exclusively on SMEs in Cyprus. Unlike freelancers, we provide depth, structure, and strategy.

Our values are simple: Be flexible, be focused, and always be local. This means listening deeply, solving actual problems (not vanity metrics), and building systems that grow as you do. We blend strategy with soul and deliver only what truly serves your business.

WHAT WE DO

Operations Efficiency & Process Optimization

Streamline your workflows, eliminate friction, and set up sustainable systems to help your business run like clockwork.

Micro-Branding & Identity Development

Create a powerful, resonant brand identity that sets you apart and stays consistent across all platforms.

Flexible Monthly Consulting Packages

Starting from just €99/month, our packages provide tailored, ongoing guidance on branding and operational performance.

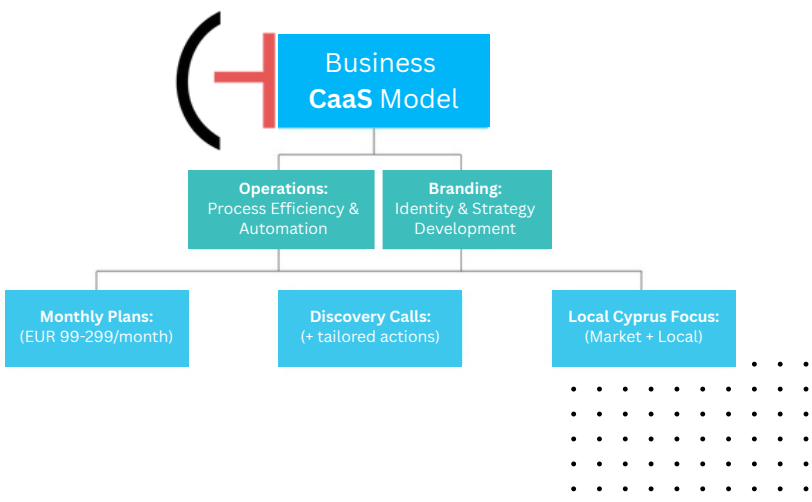

Expert-Led Implementation & Support

From automation tools to strategic content, we help you move from plan to execution - backed by local market insights.

COMPANY CHART

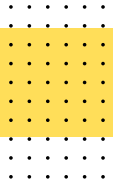

Our Structure: Our model is lean, agile, and focused entirely on delivering two core services through a highly optimized subscription-based structure. Every client starts with a discovery phase that transitions into monthly delivery and long-term strategy support.

Why It Works: We built this chart to reflect a clear path from insight to implementation. Cyprus businesses don't need complexity. They need a service that knows their reality and helps them move with speed and clarity. Our structure provides just that.

- Dual-focus model offering expert consulting in both Operations Efficiency and Branding.
- Agile, subscription-based pricing structure tailored for small business budgets.
- Deep local expertise focused exclusively on the Cyprus SME market.

BUILT FOR CYPRUS SMES

Navigating Local Challenges

Running a small business in Cyprus means facing unique hurdles - tight budgets, rapid market shifts, and evolving digital expectations. We designed our model to solve these challenges. No vague strategies. Just targeted support that makes sense for where you are and where you're headed.

A Partnership You Can Count On

We don't just consult. We collaborate. Month after month, we become part of your rhythm - guiding, adjusting, and celebrating wins with you. We're small enough to know your name and experienced enough to help transform your game.

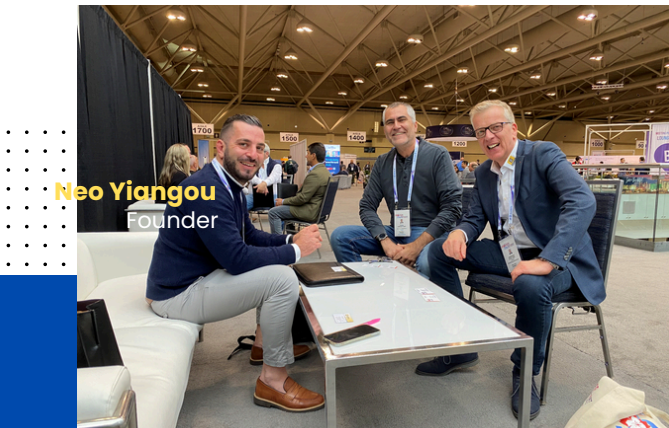

Impact Without Complexity

Our systems are simple. Our value is deep. With fixed monthly pricing, clearly defined services, and localized expertise, you gain a consulting experience that's made to move, not slow you down. From €99/month, that impact starts immediately.

MANAGEMENT TEAM

ChenzonHub is led by Neo Yiangou, a two-time recipient of the European Regional Development Fund Entrepreneurship Award (2013 & 2018) and an expert in translating vision into practical, scalable systems. With over a decade of experience driving business transformation for both boutique brands and growing SMEs, Neo brings a unique balance of creative clarity and operational rigor. His approach is rooted in local relevance - designing strategies that don't just look good on paper but work in the everyday reality of Cypriot businesses.

At the core of ChenzonHub's management is a commitment to serve - not to sell. Our leadership doesn't hide behind jargon or inflated promises. Instead, we listen, collaborate, and provide structure to the chaos of running a business. It's this hands-on, human-first mindset that allows us to partner meaningfully with each client, turning fragmented efforts into focused momentum.
